

MONEY-BACK GUARANTEE PROGRAM

Your clinicians will have a $\geq 80\%$ satisfaction rate across one or more of these measures after 60-days of using The DiskCover System

Improved:

- ✓ Compliance
- ✓ Patient Safety
- ✓ Time-Savings

Data to be collected directly from your own clinicians via a 5-point Likert Scale 60-day survey, previously published in the clinical literature. If the survey does not show we improved at least one of these three aspects, you are eligible for a full refund.

"We are so confident that you will like The DiskCover System that if you and your staff do not feel this is the best way to protect your patients from pathogen transmission from the stethoscope, we will refund your money and return the product, free of charge."
